

The official OGC Manual "Managing Successful Programmes" defines program management as **"the action of carrying out the coordinated organisation, direction and implementation of a dossier or projects and transformational activities to achieve outcomes and realise benefits of strategic importance to the business"**.

The application of Program management is key to providing the effective leadership and strategic control required within organisations managing transformational change.

Managing Successful Programmes (MSP) is the OGC Best Practice framework. Coming from the same stable as PRINCE2®, MSP represents proven good practice in program management in the successful delivery of transformational change.

The framework ensures that a structured environment is established to allow the strategic direction to be set and projects effectively to be managed to achieve the corporate goals. This structured environment ensures that the interests of the stakeholders are taken into account and the role of the Business Change Manager is detailed to ensure that there is a single person responsible for the transition of the final product from each project into its operational environment.

Throughout the approach there are mechanisms in place to allow the controlled decision-making at a high and appropriate level to drive the program and ensure that the desired outcomes are delivered. This framework is of significant relevance due to the trend towards reducing project size and managing a series of interlinked projects providing earlier benefits

Throughout the approach there are mechanisms in place to allow the controlled decision-making at a high and appropriate level to drive the program and ensure that the desired outcomes are delivered. This framework is of significant relevance due to the trend towards reducing project size and managing a series of interlinked projects providing earlier benefits.

The MSP framework is based on three core concepts:

- Principles
- Governance Themes
- Transformational Flow

Overview:	This highly interactive course will be based upon the 2007 3 rd edition of the Official OGC manual managing successful Programs and will cover the Principles, Governance Themes, and Transformational Flow that comprise the Framework. The course will also cover the appropriate application and embedding of MSP in different size of Organisations
Delivery	Classroom Presentation, slides, video, case studies, discussion, role play, sample exam papers.
Our Presenters:	All FPMS MSP presenters are experienced Programme and Project Managers who are accredited by APMG as both MSP Trainers and Consultants; they are Buzan licensed Mind Mapping instructors with Certificate IV in Workplace Assessment and Training. Our PMI approved skilful team bring alive the Framework with their real life applications and lessons learned while successfully guiding groups and organisations through the implementation of the framework and the cultural change.
